

First manual ratchet-action cable cutter for one-hand and two-hand operation for cutting through copper and aluminium cables with diameters of up to 60 mm!

## KNIPEX Cable Cutter

**Sturdy. Easy to use. Stable.  
Innovative ratchet-drive.  
For cable up to 60 mm diameter.**

- easy handling due to low weight (800 g) and compact construction (320 mm length) – usable in confined areas also
- cutting through copper and aluminium cables with diameters of up to 60 mm in one-hand and two-hand operation
- hardened cutting edges, precisely ground, cut smoothly and neatly without crushing
- for cutting copper and aluminium single conductors as well as multiple stranded cables (not suitable for steel wire and wire ropes)
- innovative three-stage ratchet-drive with high leverage for easy cutting in one-hand and two-hand operation
- fixed handle with support area for putting down the pliers when cutting
- High-grade special tool steel, forged, oil-hardened

## Sturdy. Easy to use. Stable.

The first manual ratchet-action cable cutter for one-hand and two-hand operation for cutting copper and aluminium cables with diameters of up to 60 mm!

Thick cables are cut everywhere, in wind turbines, transformer stations and cable trenches etc. Heavy electrically operated systems are often used for this purpose. With the new sturdy and compact ratchet-action cable cutter, KNIPEX proves that it is by all means possible to cut thick cables by hand – even with just one hand if necessary.

## With 3-stage drive in one-hand and two-hand operation.

Special feature: This professional-class cutter from KNIPEX is the first manual ratchet-action cable cutter that cuts through copper and aluminium cables with diameters of up to 60 mm. It features "3-stage drive", allowing thick cables of up to 60 mm in diameter to be cut through without any problem – using either one or both hands.

The "1st stage" is ideal for one-hand operation: the blades cut with minimum feed, allowing an easy and comfortable transmission of manual force to cutting force and a favourable gripping position, even for small hands. In the 3rd stage the blades cut through the cables with maximum feed.

The ratchet-action cable cutter is distinguished by simple handling, low weight and a compact design. It is excellent for use in confined areas, too.

As a professional tool the ratchet-action cable cutter is suitable for the demands of day-to-day use. Its serration is insensitive to dirt, it is sturdy and comfortable to hold and it features good stability and long service life.
